- (a) Excludes permanent Defence Forces in Australia and Overseas and National Service trainees in camp. Estimated total employment is obtained from annual Factory Censuses, returns of Government Employment, Pay-roll Tax returns, other direct collections, and estimates of the number of employees not covered by these collections. The results of the 1961 Population Census indicate that some revisions of these estimates will be necessary.
- (b) Includes employees of Government Authorities (Commonwealth, State, and Local) on services such as railways, tramways, banks, post-office, air transport, education, broadcasting, police, public works, &c., as well as administrative employees.
- (c) As recorded at the annual Censuses of Factories to June, 1962, with interim estimates for subsequent months.
- (d) Includes education, health, hotels and restaurants, other professional and personal services (except female private domestics).

(a) This index was first published in August, 1960. It has been compiled for periods from September Quarter, 1948.

(b) This index does not measure changes in price of all imports.

(c) The indexes for "Goods Principally Home-Produced" and "All Groups" have been reconstructed as from the base period by excluding potatoes and onions. For September, 1963, indexes comparable with those previously published, including potatoes and onions, were: Goods Principally Home-Produced, 374; All Groups, 344.

(a) Up to and including 1958 average rainfall for each year (represented by 100) is the average over the period 1911–1942. As from 1st January, 1959 a long period average from a selection of representative stations is used.

SEASONAL CONDITIONS, TASMANIA: SEPTEMBER, 1963

Rainfall: The coastal areas of the Southeast and the East Coast as far north as St. Helens were the only areas of the State to receive less than normal falls during the month and about 25 percent less than average was recorded in these areas. All other divisions received normal to well above normal falls and small areas in the Central Plateau, the Central North near Beaconsfield and an area near Burnie, all received falls ranging from 75 percent to 100 percent above normal.

Good falls of six to eight inches were recorded in the Northwest and these graded to four to six inches in the Central North, the Northeast, the Central Plateau and Upper Derwent. The West Coast and highlands received the heaviest falls for the State.

Temperatures: Maximum temperatures during the first two weeks were below normal fairly generally, particularly on the West Coast and Central Plateau, but in the second half of the month, marked increases in maxima occurred throughout the State. During the latter half of the month below normal temperatures were registered only on the 23rd and 24th and these were confined mainly to the East and Southeast. Over the whole month the mean maxima were slightly above normal in all areas except for areas of the North Coast and at isolated places on the East Coast, the far South and the West Coast highland regions.

Floods: Rivers started to rise in the North on the 12th and minor flooding occurred on the 13th and 14th in other areas. By the 16th however, the only rivers still high were confined to the North and Northwest.

Crops, Pasture, Stock, &c.: Crops and pastures in most areas were described as fair to good. Stock generally were in fair to good condition also although in some parts of the Midlands and Derwent Valley they were reported to be indifferent to poor.
